

## Water You Can Feel Good About Drinking

Between aging infrastructure, plastic waste, and limited water resources – everyone needs a better option. We designed SOURCE to bring perfected drinking water to every person, in every place. Designed to be off-grid and self-contained – SOURCE gives you independence over your water while saving money, water waste, and plastic trash.

### One SOURCE Hydropanel

**offsets 54,750**

standard plastic water bottles  
over its lifetime

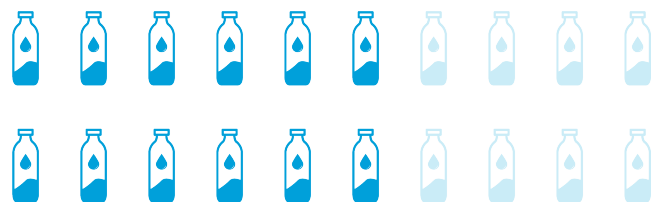

**saves 109,500**

litres of reverse osmosis water  
waste over its lifetime

## Water Production

SOURCE Hydropanels are installed with a wireless communication system which reports data back to Zero Mass Water's Network Operation Center. Using advanced water capture technology, under typical sunny conditions a SOURCE array replaces more than a twelve-pack and up to a 20-pack of bottled water each day.\*

\*sunny conditions >20% RH, 500 ml bottles
